

Everything included with your CenturionPro automated trimmer.
All CenturionPro trimming machines now come with a double set of tumblers.

UNSURPASSED QUALITY

Durability

Composed entirely of anodized aluminum and stainless steel, CenturionPro trimmers are built to withstand prolonged use with zero issues.

Toro Cutting Reels

High quality Toro hardened steel cutting reels, combined with our magnetic blade technology, ensures a consistently sharp blade and the cleanest cut in the industry.

Rugged Stainless Steel Tumblers

Our standard Dual-Purpose Hybrid tumblers are made of rugged stainless steel. Larger tumbler diameter ensures greater efficiency and output compared to other machines on the market.

Quantanium Coating

Our Quantum coated tumblers give 40% greater trichome preservation by preventing precious trichomes from adhering to the tumbler surface. Learn more at: cprosolutions.com/quantanium

SIMPLISTIC DESIGN

Easy to Clean

All of our machines, excluding the tumblers, can be quickly cleaned with a pressure washer in 10-20 minutes. The tumblers are easily cleaned with warm soapy water and a quick wipe.

BEST PERFORMANCE IN THE INDUSTRY

Higher Cutting Power

Incredible cutting power ranging from 20,000 to 140,000 cuts per minute. Each system also comes with a well-designed leaf collector with a range of 1-6 hp motors for high suction power.

Higher Processing Capacity

CenturionPro machines have an impressive processing capabilities, with the ability to do the work of up to 160 staff. This allows our machines to trim a substantial amount of product per hour, dry or wet.

Finely Tuned Diverter

Ensure the preservation of different strains and densities with our unique diverter, which allows you to fine tune air flow and cut during the trimming process.

Triple-Bag Kief Collection System

Our triple-bag system is designed for trim & kief collection, in addition to cleanliness, so no precious product is wasted.

UNSURPASSED CUSTOMER SUPPORT

BEST WARRANTY IN THE INDUSTRY

At CenturionPro, we know of the problems associated with downtime and the importance of tight timelines when it comes to the harvesting process. This is why all our machines are backed by an industry leading warranty (trimmers = 10 Years / buckers = 5 Years). Our knowledge, experience and technology will keep you up and running smoothly for decades to come.

Trust us, we got your back!!

INDUSTRIAL MACHINES

Do you have a commercial operation that requires industrial scale harvesting machines? Experience unparalleled feed rates by processing up to 3000 lbs of wet material (600 lbs dry) per hour with our comprehensive line of XL trimming and bucking systems. Visit our website for more details or call us at 1-855-535-0558 for a free consultation.

TRIM BOTH
WET
AND/OR
DRY

- Our machines are specially designed to trim both wet and dry material.
- All CenturionPro trimming machines also now come with an additional tumbler, for every tumbler the machine can accommodate, so you can keep on trimming. Avoid unnecessary downtime for cleaning. Just swap the tumbler out and keep running.

GC1 BUCKER

GC refers to "Gentle Cut" as we appreciate and understand how delicate flowers are. This buckler cuts the flowers off the stem, which prevents the large crown buds from breaking apart into smaller pieces. This keeps the structure of the buds fully intact preserving the look of the flower.

The GC1 can do the work of up to 3 workers and process up to 40 lbs per hour of fully hydrated flowers! The GC1 accepts wet or dry stems up to 3/8" in diameter and produces over 3000 cuts per minute with a 0.25hp motor. Plus it is easy to set up, clean and requires little maintenance!

** HP1 stand included with the option of industrial casters or flat free off-road tires.

HP1 BUCKER

HP refers to "High Performance" and utilizes two rollers that pull the stem into the machine and pop the flowers off. This allows you to continuously feed the buckler for more efficient de-stemming and results in the industry's highest feed rate per hour.

The HP1 single workstation model comes with both a buckler stand and legs for optional table-top set up. With 5 infeed sizes, the HP1 accepts wet or dry stems up to 3/4" in diameter and can process up to 175 lbs wet per hour, replacing up to 7 workers. Made of stainless steel and anodized aluminum, it is robust and easy to maintain.

HP3 TRIPLE BUCKER

The first triple-headed buckler, the HP3 can process up to 500 lbs per hour of fully hydrated flower. With variable speed control this de-stemmer provides unsurpassed power, adjustability, control and is easy to set up and clean. Made of stainless steel and anodized aluminum, it is robust and easy to maintain.
